# DISCOUNTS

## GRIFFING'S SYSTEM

◆ ◆ ◆

### QUANTITY DISCOUNTS

We solicit large orders and as an inducement, we offer the following schedule of discounts instead of making each, 10, and 100 rates as practiced by some Nurserymen:

4%	on total order of \$ 50.00 or more
6%	on total order of 100.00 or more
8%	on total order of 250.00 or more
10%	on total order of 500.00 or more
15%	on total order of 1,000.00 or more

### TAKE NOTICE

This saves you having to buy more than you need of one variety or size in order to get a discount on your purchases. Above \$50.00 all you buy from this catalog, regardless of whether you take one of a kind or 5, 50, or 500, the more you buy the more you save.

### SAVE MONEY BY TAKING ADVANTAGE OF 5% CASH DISCOUNT

**TERMS:** Cash. All accounts are payable at Beaumont, Texas. 5 per cent discount for cash with order. Where credit is established, 2 per cent for payment within ten days, net 30 days.

#### Members of:

- American Association of Nurserymen
- Society of American Florists and Ornamental Horticulturists.
- Texas Association of Nurserymen
- Texas State Florists' Association
- Texas Horticultural Society
- Beaumont Florists & Nurserymen's Club
- Beaumont Chamber of Commerce
- Beaumont Young Men's Business League.

## NEW REDUCED PRICES

This list supersedes and cancels all outstanding wholesale quotations. Prices are subject to change without notice.

### Your Customer Pays Freight

**TRANSPORTATION:** We can deliver to any point in the Gulf Coast territory at l. c. l. freight rates, either by motor freight truck or our own trucks. When we have a truckload of 5,000 or 7,000 lbs. for a certain destination, we can make delivery to your packing house or to your job. Write for our truck delivery prices.

All prices are f. o. b. our Nurseries and shipments travel at the risk and expense of the purchaser. We load trucks and carloads at our Nurseries or Mt. Evergreen, Texas. Express and less carload shipments are made from Beaumont, Texas.

### OUR RESPONSIBILITY

**GUARANTEE:** We will replace any plants not true to name or up to grade, but shall be liable only for the purchase price received. All carriers are responsible for any damage or injury in transit.

### WE INVITE "KICKS"

**CLAIMS:** Any claims must be made upon receipt of shipment or within five days. Complaints properly presented will be given special attention. Be sure to have exception for damages noted on transportation receipt at time of delivery.

### B&B—THE GRIFFING WAY

**WHAT IS B&B?** Moving a tree with the roots in the soil in which it grew.

**OUR BEAUMONT BALLING SOIL.** Our great success in transplanting Trees and Shrubs safely at all seasons of the year may be largely attributed to our wonderful Balling Soil. There is no other just like it. We have the soil that is just right for balling and burlapping. The ball is spaded out of the ground in one solid piece, often compared to slicing a piece of cheese.

Our particular soil is known among Oil Company Geologists as "BEAUMONT LOAM" peculiar only to this section. It is rich and black, and when taken up in the form of a Ball, it will not crack or crumble; nor does it dissolve or melt down when set in water for weeks. On the contrary, this is the way to preserve the life of the Trees.

**WHAT IS NB?** A Tree or Shrub dug with naked roots (Not Balled), puddled and packed in wet packing material.

## STANDARDIZED GRADING

In 1923, the American Association of Nurserymen adopted a Standardized System for Grading Nursery Stock, using the symbol of X's to indicate **QUALITY** and dividing the various classes of Evergreens into Grade Groups. In our judgment, this is the only way to honestly grade and sell Nursery Stock.

When you visit our Nurseries, we will be glad to show you what is meant by **Standardized Grading**, and when you order, if you will specify the **Quality** you want, we will make your selection accordingly. We give the following illustration to show what is meant by **Grading by X's**—all plants are the same height, but there is a great difference in the general appearance and value.

Griffing's Waxleaf Ligustrum illustrating Quality.

Throughout this list, you will find the schedule of prices are according to X's.

**XXX** indicates strictly heavy, low branched, choice Trees or Shrubs.

**XX** indicates well developed, medium branched, good merchantable Trees or Shrubs.

**X** indicates a fair quality, measured by height, and not necessarily perfect Specimens.

**SPECIMEN STOCK** selected or marked in the Nurseries will be priced according to its value.

**NOTICE:** If you do not find the stock you want listed, please write us and we may be able to supply you. We have many varieties in insufficient quantities to warrant listing. We invite correspondence and are ready to assist our patrons in every way we can.

View of 300-Acre Nursery Field and Headquarters

## ALPHABETICAL LISTING

All Trees, Shrubs and Vines listed in this catalog are under their common names, according to "Standardized Plant Names."

For your convenience in finding what you want, we are listing all Trees and Shrubs by their common names in Alphabetical Order. We are cross indexing the botanical names and synonyms to assist you in finding what you may be looking for.

### ABELIA GLOSSY

Attractive Evergreen Shrub.

Approx. Ht.	Class	X	XX	XXX	
18-24 in.....	B&B \$	.30	.50	.70	each
2 - 3 ft.....	B&B .50	.75	.95		each

36-42 in.	B&B		2.00	2.70	each

**CAMELLIA****Camellia japonica**

Probably the most sought-after shrub of the South. We have some extra special varieties in large specimens, but due to the character of growth and demand for special varieties, we can not spare space in this catalog to classify and grade them. We have them priced in the field, you would want to see the flowers, size and shape of the individual plants, growing in our Beaumont Balling Soil and can be transplanted safely. We cordially INVITE you to come and select such varieties and plants you want.

**CAMPHOR****Cinnamomum camphora**

Bright green foliage, changing to bronze, crimson and wine in season. Recommended for the Gulf Coast section only.

Caliper	Approx. Ht.	Class			
2 - 2½ in. Clpr.	Cut off 6 ft.	B&B	\$ .90	each

**E. pungens nana**

Elaeagnus is one of the newer Broadleaf Evergreens that has gained popularity in the last few years. It provides a contrast in color of foliage, and grows equally well in Sun or Shade.

**GRIFFING'S COMPACT**

New unusual variety, a sport of Fruitlandi discovered by us in 1934. Preferred to other types of Elaeagnus by many customers and Landscape men because of its close, compact attractive growth.

**ROSEDALE**

A new sport. Small leaves, upright grower, many small branches. Where used in shade for Hedges with its new bronze leaves and brownish bark, makes excellent contrast color in plantings.

**CUTTING GROWN**

**Nandina aurea****NERIUM See Oleanders****ORANGE See Citrus Fruits**

**OAK, SPANISH LIVE*****Quercus virginiana***

Nursery grown Live Oak Trees live and thrive under all conditions when the Trees have been root-pruned and properly balled from the right kind of balling soil and pruned properly before they are dug.

**SPANISH LIVE OAK**

We have the complete stock from Acorns gathered in Florida from the choicest isolated grove in existence, so there is not a chance of hybridizing. This true type of fast-growing Oaks are destined to revise the idea that Live Oaks are a slow growing tree, much different from the ordinary native Live Oak in Louisiana and Texas, which we call the Scrub Live Oak, but takes too long to grow.

**FAST GROWING EVERGREEN SPANISH LIVE OAK**

Always clean, rich green foliage. Very straight bodies. From young seedlings we trim to single stem in center, not allowing forks even on our 20 foot trees. In centuries to come these forked trees may split open and ruin the tree.

Approx. Ht.	Class	X	Caliper	XX	XXX

6 - 8 ft.....	B&B.....	5.50	7.50

**SANDANKWA****Viburnum suspensum**

Very compact, bushy habit of growth; oval leaves toothed toward the tip.

Approx. Sprd.	Class	XX	XXX
2 - 2 $\frac{1}{2}$ ft.....	B&B.....	\$2.40	\$2.90
2 $\frac{1}{2}$ - 3 ft.....	B&B.....	3.00	3.80
3 - 4 ft.....	B&B.....	3.80	4.80

**VINE, DWARF CONFEDERATE JASMINE*****Trachelospermum jasminoides***

A rather slow growing evergreen vine with small short-stalked leaves. As a ground cover, it is excellent.

**CLIMBING FIG*****Ficus repens***

Small heart-shaped leaves. Evergreen vine will cling to walls or any type of masonry.

**ROSA-de-MONTANA*****Antigonon leptopus***

Flowers are bright pink produced in numerous drooping racemes.

**Approx. Size****X XX**

From Small Pots.....	\$ .25	\$ .35	each
From Medium Pots.....	.50	.70	each
From Large Pots.....	.90	1.25	each

Climbing Fig Vines

AMUR RIVER FIG HEDGE IN BLOOM

**WILLOW, WEEPING*****Salix babylonica***

Long pendulous branches with long narrow grayish-green leaves.

**TRIMMED TO STANDARDS****Approx. Ht.****Class****XX**

# HOW TO PLANT

## Plant Right AND Trees Will Grow

**HOW TO PLANT B&B TREES:** Dig a hole a few inches wider than the ball itself. For heavy or poorly drained land, set the ball with its shoulders level or from one to two inches above the level of the land. For light, sandy soil, the ball should be about two inches below the level of the land. If the dirt in the bottom of the hole is dry, fill the hole with water once or twice and let it soak into the ground. Then set the ball in the hole.

Do not use the loose dirt that is taken from the hole as back-fill. Instead, start spading the outer walls of the hole in toward the ball, about one foot deep. Keep spading around until the ground is broken two or three feet from the ball. Then press firmly toward the ball, using the feet or a heavy "tamp."

Next, hill the dirt up around the stem of the plant four to eight inches high and as far out as the ball reaches. Beginning at the outer edge of the spaded area, using the dirt taken from the hole, make a rim from four to six inches high and from eight to twelve inches wide to form a basin, to hold water, so it will soak down under the ball. Leave the basin for months after planting.

**TO WATER,** push the end of the hose down beside the ball and let water run until the basin is full. This will fill the air spaces. Mulch with about a bushel or more of rough stable manure, leaves or lawn clippings.

**HOW TO PLANT NB TREES:** All NB (Bare Root) Trees lose a part of their roots in transplanting. To offset the root loss, the branches should be pruned back half way or more as soon as planted. To plant NB Trees, Roses, etc., a change of color can be seen on the trunks where the surface level should be. Fill in fine soil among the roots, placing the roots carefully in the position they should grow. Then follow the same instructions as for planting B&B Trees.
